CERTIFICATE OF PARTICIPATION

CNMM2023/ T01-2023015

This certificate is proudly presented to

ASSAS Taqiyeddine

LAHE Laboratory, Biskra University, Biskra, Algeria

Has successfully participated at the

1ST National Conference on Mechanics and Materials NCMM'2023

06 - 07 December 2023, Boumerdes University- Algeria

By presenting, a communication entitled:

A NOVEL C0 STRAIN BASED FINITE ELEMENT FOR STATIC ANALYSES OF FUNCTIONALLY GRADED PLATES

Co-authors: Messaoud Bourezane , Madjda Chenafi , Seyfeddine Benabid

Signature

Prof. LECHEB Samir
President of Organizing
Committee

National Conference on Mechanics and Materials

NCMM'2023

6-7 Dec 2023. Boumerdes, Algeria

PROGRAM

Day 01		Wednesday, December 06, 2023
09 :00- 09 :30	<u>Reception</u>	-(Campus oust Library – Faculty of Technology - University of Boumerdes)
09 :30- 09 :45	<u>Opening</u>	- Pr. Mustapha YAHI (Rector of University), Pr. M. SAIDI (Dean of Faculty), Pr. A. CHELLIL (Chairmen of NCMM), Dr. MECHAKRA (Co-Chair of Organization Committee)
09:45 – 10 :15	<u>Plenary I</u>	- 'Artificial intelligence (AI), STARTUP, invention, Entrepreneurship, ecosystem Pr. S.Lecheb, A.Daoui, Y.Guerbai, D.Benayad, A.Meziane, INCUBATOR-CATI-CDE-BLEU-AI, UMBB
10:15 – 10 :30	<u>Plenary II</u>	- 'Hydrogen and GREEN ENERGY - Pr. Kamel MOHAMMEDI - Univ. Boumerdes
10:30 - 11:00	Coffee break - Poster Session I	
11:00 - 13:00	Oral session I	
13:00- 14:00	Lunch	
14:00- 16:00	Oral session II	
16:00- 16:30	Coffee break - Poster Session II	
16:30- 18:00	Oral session III	

09:30- 16:00 Online session first day December 6, 2023

Day 02		Thursday, December 07, 2023
09:30- 10:00	<u>Plenary III</u>	- Pr. Leila ALIOUANE 'ARTIFICIAL INTELLIGENCE IN EARTH SCIENCES FOR POROSITY PREDICTION IN PETROLEUM RESERVOIR FROM GEOPHYSICAL WELL-LOGS DATA. APPLICATION TO ALGERIAN SAHARA" Univ. Boumerdes
10:00 - 10:30	Oral session IV	
10:30 - 11:00	Startup Pitch	
11:00 - 11:30	Coffee break - Poster Session III	
11:30- 12:00	<u>Closing</u>	Pr. M. SAIDI (Dean of Faculty), Dr. A. DAOUI, Pr. B.SAFI, Pr. S. LECHEB

12:00- 15:00 Social program Visit to The Great Mosque of Algiers, Djamaâ El-Djazaïr

Day 1 : December 06, 2023

11:00 - 13:00

Oral Session I On-site (Room- Conference)

The National Conference on Mechanics and Materials (NCMM'2023) will be held in Faculty of Technology / Boumerdes University, Algeria during December 06-07, 2023. The main goal of which is to strengthen communication between the higher education family and industrialists, bring the socio-economic sector closer to academic skills and public administration. Our goal is to establish a national ecosystem favourable to investment, through communication between the sectors concerned. Also, through this conference, we wish to draw a roadmap that pushes the economy and national development towards progress.

The second National Conference on Mechanic and Material (NCMM'2023) will be held in Faculty of Technology / Boumerdes University, Algeria during November 15-16, 2023. The main goal of which is to strengthen communication between the higher education family and industrialists, bring the socio-economic sector closer to academic skills and public administration. Our goal is to establish a national ecosystem favorable to investment, through communication between the sectors concerned. In addition, through this conference, we wish to draw a roadmap that pushes the economy and national development towards progress.

To this end, this conference focuses on topic below:

Topic 01: Materials Science

Topic 02: Mechanical Construction and Manufacturing

Topic 03: Maintenance

Topic 04: Vibration and dynamic

Topic 05: Fracture Mechanics and Fatigue and Damage

Topic 06: Non Destructive Testing and detection

Topic 07: Composite Materials

Topic 08: Tribology

Topic 09: Mechatronics and Electromechanical

Topic 10: Industrial Engineering

Topic 11: Energetic and Renewable Energy

Topic 12: Innovation and Startup

Topic 13: Green hydrogen and recycling

Topic 14: Civil engineering

Topic 15: Intelligence Artificial and Robotic

Topic 16: Process Engineering

Ahmed CHELLIL

Plenary Conferences

Keynote Speakers

**Plenary I- Prof. Samir LECHEB, Dircetor of Incubator,
UniversityM'hamed Bougara Boumerdes, Algeria ; “Support of
startups and spinoffs to obtain label by university incubators for develop
innovation in Algeria”**

As part of ministerial decree 1275 for the support of end-of-cycle students: third year bachelor's degree, second year master's degree and doctoral student, innovative project leaders, to create startups and spinoffs, through workshops and training at the level university incubators and accelerators, in collaboration with research centers and the socio-economic sector. In order to develop innovation and encourage as many young people as possible to enter the field of business in Algeria.

Keys Words: Startup, Spinoff, Innovation, Incubator, University

**Plenary II- Prof. Kamel Mohammedi, University M'hamed Bougara
Boumerdes, Algeria ; “ Green Hydrogen and Long Term Energy
Strategies”**

**Plenary III- Prof. Leila ALIOUANE, UniversityM'hamed Bougara
Boumerdes, Algeria; “artificial intelligence in earth sciences for porosity
prediction in petroleum reservoir from geophysical well-logs data”,**

Artificial Intelligence techniques are becoming very popular in earth sciences, in the last decade, mainly in petroleum exploration and exploitation. Reservoir characterization by geophysical well-logs data analysis is commonly conducted and plays a central role in formation evaluation in petroleum domain. The most petrophysical parameters that describe the reservoir are the porosity, the permeability and the water saturation where the porosity is the main key. Using conventional methods, the estimation of the porosity is very difficult, mainly in shaly reservoirs where the presence of clay affects considerably, the porosity and the permeability. For that, we propose to accurately predict the porosity from geophysical recordings crossed the formation of wells using machine-learning methods such as multilayer neural network. The input layer are constituted by the petrophysical well-logs data and the output layer presented by one neuron corresponding to the porosity predicted.

Abstract

The static bending of functionally graded material (FGM) plates is examined by altering the volume proportion of the ceramic and metallic elements using a simple power law distribution. The deflection and stresses are estimated numerically using a four-node quadrilateral finite element called QSBP20 (Quadrilateral Strain-Based Plate with 20 degrees of freedom) created by Belouar et al. This element is created by superimposing two strain-based elements, the first being a membrane based on the strain approach with two (U, V) degrees of freedom per node and the second being a Reissner-Mindlin plate based on the FSDT with three (w, θ_x, θ_y) degrees of freedom per node at each of the four corner nodes. To simplify the issue and prevent membrane-bending coupling, the idea of the neutral surface position is developed. The current model's comparison with existing literature is full and determined to be logical. For the current task, in-house MATLAB code has been built. The parametric research is being conducted to investigate the influence of the side-to-thickness ratio, aspect ratio, thickness, and volume fraction index on stresses and transverse displacements

Keywords:Strain based • Static Bending • FGM plate• Finite element . Reissner-Mindlin plate.
